Organizational and Personnel Changes

Mazda Motor Corporation has announced the following organizational and personnel changes, effective March 1, 2018.

1. Organizational Changes

Changes in the area of integrated control systems development

Aim

- As electronic systems become increasingly complex, create an organizational framework for the collective development of technologies based on a consistent strategy and equip it with a management system aimed at enhancing the efficiency and effectiveness of development.

Details of the organizational changes

- Establish the Infotainment & Control Model Development Dept. and transfer the functions of developing communication and information systems from the Electrical & Electronics Development Dept. to it.
- Establish the Electronic Platform Development Dept. and transfer the functions of developing electronic component from the Electrical and Electronics Development Dept. to it.
- Establish the Electrical & Electronics Performance Development Dept. and transfer the functions of testing and researching electric and electronic components from the Electrical and Electronics Development Dept. to it.
- In line with above changes, abolish the Electrical & Electronics Development Dept.
