Plant Operations at Mazda

Mazda has decided to extend a plant suspension period which already started during the nightshift on Monday, Aug. 23 caused by the cancellation of cargo shipments from China as follows. The decision has been made due to the uncertainty as to when the cargo shipping services will resume.

Plants: Hiroshima Plant and Hofu Plant

Planned suspension period: Day and night shifts for a period between Aug. 25 and 27

We apologize to our customers and all the other stakeholders for the inconvenience and concerns this production adjustment will cause. We will give our utmost efforts in minimizing the impact on sales, services and on business partners who cooperate with us on this matter.
